

Hi! My name is Siphokazi.

I am a fun, loving, enthusiastic 18 year old girl. I have Spastic Quadriplegic Cerebral Palsy, Hypertension, Nephritic Syndrome and recently I have developed Epilepsy. I have to take a daily concoction of prescription medication and pain killers to ease my aching body caused by the spasticity but I don't let that stop me from being happy and enjoying life

Siphokazi Ginya was born on the 31st of January 1999. She was abandoned and poorly cared for until the age of four where she was rescued from a back room in an informal settlement.

Gabriella Centre has been able to give Siphokazi something she didn't have – a family. At Gabriella Centre she receives the best possible care and love by all of the Nurses and Carers.

Siphokazi attends an ECD Class where she learns life skills as well as basic school work. She receives daily therapeutic activities such as Physiotherapy, Occupational Therapy and many other forms.

Although we at Gabriella Centre are trying our very best to give Siphokazi the best quality life - we too are struggling with the financial strain of caring for her.

Siphokazi receives a minimal government grant from SASA monthly but with her living costs amounting to R10 000 per month it barely grazes that total.

Please consider opening your hearts and sponsoring Siphokazi to give her the very best that she deserves.
